products

A wise choice

THE
CLEANEST
PROJECT

Veganism is a way of life that excludes, as far as possible, all forms of exploitation and cruelty towards animals in order to obtain consumer products, and therefore rejects the use of any product of animal origin.

This movement, which is becoming increasingly common among the population, encourages the existence of vegan alternatives: food, clothing, shoes, fashion accessories, medicines, cosmetics, perfumes and cleaning products.

In response to these requirements, **SUCITESA launches a careful selection of professional cleaning products with VEGAN seal** with Cruelty free products and formulas that do not contain any ingredient of animal origin.

With formulas based on organic ingredients such as natural acids (citric, formic), perfumes that are not classified for allergic sensitivity.

With easily and rapidly biodegradable surfactants.

ECOLABEL certified products

Not tested on animals.
